Lighten the load with Knox

In partnership with **SAMSUNG**

Rock-solid security is non-negotiable

But many organisations struggle with overworked IT teams that may not have the capacity or time to keep up with evolving threats.

When you have support to take care of compliance and procurement admin, you can relieve the burden on your team and let them get back to doing value-adding work.

600 hours per month are wasted remediating threats caused by human error, a Forrester report found¹

In partnership with Samsung, Virgin Media O₂ Business can bring you the tools you need to keep your teams safe.

Like the Knox Suite, a comprehensive set of security tools that make things easier for your IT team without compromising on safety.

Knox Suite is trusted to protect more than 1 billion devices worldwide²

Get specialist protection Let us take care of the nitty-gritty

- Keep your organisation safe without the admin burden – automatic device monitoring means that you stay on top of things
- Take the headache out of compliance with common-sense security tools, like secure folders for sensitive data
- Make deploying and setting up devices easy with remote-management tools on simple user interfaces

More productivity. Less stress.

Free your IT team from menial tasks and empower them to do more value-adding work.

Easy lifecycle management with Mobile Enrolment

Remotely enrol the whole fleet on your system. No need to even take devices out of the box.

- Easily re-enrol devices when you need to – you can even bypass factory reset
- Reduce set-up time by up to seven minutes per device
- Let new starters begin working right away

Full control with E-FOTA

Easily manage operating systems across your fleet. Ensure that the right version is deployed to every device.

- Remotely deploy operating system versions – no user interaction required
- Choose when to push updates so you reduce downtime
- See the effects that updates will have before pushing them
- Set rules to trigger mandatory firmware updates so that you stay compliant

You'll also benefit from:

Asset intelligence:

Data on devices show you the full picture

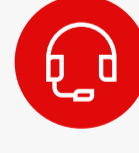

Know how to support your teams with the full picture of device utilisation, battery statuses, GPS tracking, and any abnormal activity.

Service plugin:

Zero-touch configuration makes compliance easy

Set up company branding, add essential apps and remove superfluous, pre-installed ones – all without even touching the device.

Consultancy days:

Extra support ensures that you get value for money

Virgin Media O₂ Business teams offer expert support to help your devices. We're always happy to make sure that you understand the Knox Suite and its benefits.
