Teams thrive when devices are shaped around their needs

In partnership with **SAMSUNG**

Flexibility doubles the output of your staff, according to Forbes¹ and Gartner.²

Your teams need devices and connectivity to support that flexibility. And you need bulletproof security and hassle-free device management to make sure that they succeed.

In partnership with Samsung, we're here to help

We've teamed up to bring you the tools that your teams need to thrive. With us, you get the most reliable mobile connectivity³ and the latest devices. So your teams can do their best work, right from their phones, whether they are at home or in the office.

Get the right mobile for any job

XCover 5

Ultra-sensitive touchscreen responds to gloved hands – perfect for workers in the field

Easily swap out a dead battery for a freshly charged one – teams always stay connected

Galaxy A53

Dust-proof and waterproof – made for working on the frontline or in the field

High-definition visuals mean that teams won't miss a thing

Plan for success

Security is a long game. There is no set-and-forget button you can push to keep your fleet of devices secure over time. Many organisations find their IT teams struggle with the workload that security threats create. Providing your teams with devices that are always secure and up to date means that your IT team have fewer menial tasks and can get back to the value-adding work they love.

“Cybersecurity has always been a never-ending race. But the rate of change is accelerating. Companies are layering more systems into their IT networks to support remote work, enhance the customer experience and generate value, all of which creates potential new vulnerabilities.”

– McKinsey⁴

You need reassurance that your organisation will stay secure and compliant in the long term.

With us, you get:

Five years of security and maintenance

We take care of your firmware updates for five years. That's expert protection to keep you ahead of security threats and to grow with you as your goals change.

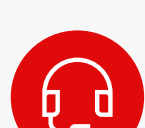

- Monthly or quarterly updates – always have the latest Android and Samsung security and maintenance patches
- Protection against malware and phishing
- Constant defence against new types of threats
- No weak spots from out-of-date software or devices

Product lifecycle support

Life's easier when your teams all use the same type of mobile. We'll make your device fleet available even when that device is no longer in stores.

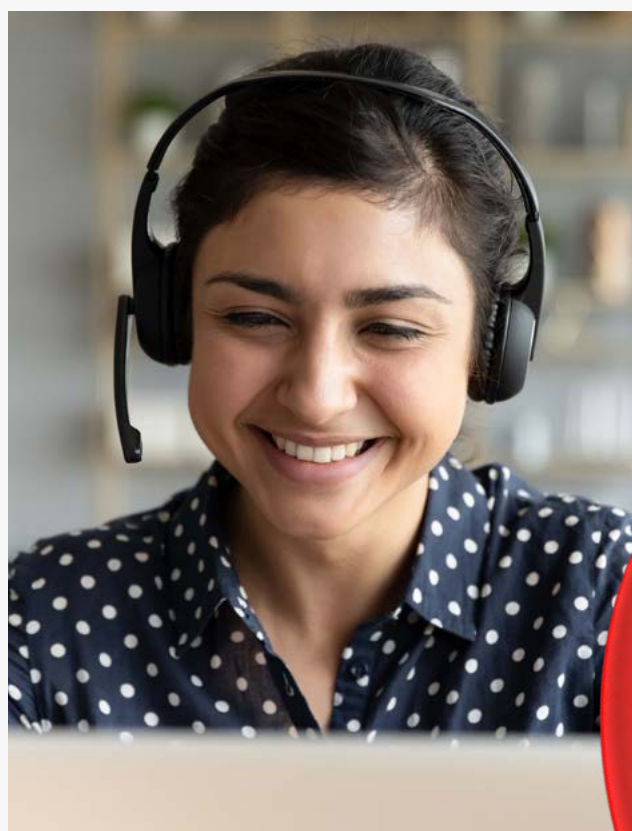

- Samsung Enterprise Edition devices have an extended lifecycle, ensuring that your employees get a consistent experience
- Lost device? Get a new one within 24 hours and avoid downtime⁵
- Get support on your devices 365 days of the year so teams stay productive

Three years of enhanced support

Technology moves fast. We provide enhanced support for three years to help you stay current and to lighten the load on IT teams.

- Onboarding call so you understand Samsung Enterprise Edition features
- Regular check-ins to make sure that everything is running smoothly
- Samsung's UK-based Business Services Centre can take care of technical support
